DETAILED ACTION

Election

Applicant's election without traverse of Group I, claims 1-5, in the reply filed on April 24, 2006 is acknowledged.

Claims 1, 3, and 4 have been amended, according to the amendment filed on December 23, 2005.

Response to Arguments

Applicant's arguments filed on December 23, 2005 have been fully considered but they are not persuasive. There no where in claims 1-5 where the device limits the device intended t be used as a diagnostic device and consequently is intended to be adjusted while a patient is asleep. The claims are rejected in the following manner.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Woo (U.S. Patent No. 6,012,920). Woo discloses in Figure 1 an articulating connector (8) for a mandibular repositioning appliance (6) comprises an upper and lower housings (10a, 10b) each pivotally

Art Unit: 3743

mounted on a pin (20) and rotatable about the axis of the pin (20), to selectively permit movement of the mandible in the lateral direction, thereby, providing movement of the upper housing (10a) relative to the lower housing (10b). With regards to the connector (8) protruding forwardly from the trays (2, 3), as illustrating in figure 1, the device is currently mounted on the side of the trays (2, 4). However, should the device mounted directly in front of the trays (2, 4), the connector (8) would be protruding forwardly from the trays (2, 4).

Allowable Subject Matter

Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3743

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
